OTOFORM® A SOFTX BOOST

Our popular impression material Otoform® A softX is now even faster. The curing process in the ear only takes 90 seconds, clearly indicated by a color shift from green to neon yellow.

- + BOOST: Instead of 180 only 90 seconds curing time
- + SAFE: Color change from green to neon yellow shows, that the material has cured
- + PERFECT: For especially deep ear impressions, ITE, CIC and IIC
- + KID FRIENDLY: Due to the short time in the ear suitable for children and sensitive ear tissue
- **+ EASY TO USE:** Very good flow characteristics, easy to apply and absolutely thixotropic
- + COMFORTABLE: Removing the impression from the ear is simple and smooth

Conventional impression material 180 seconds curing time

RELIABLE IN ALL CONDITIONS

THE EARMOLD

Individualized hearing aid fittings with customized earmolds allow you to exploit the full potential of the hearing system technology.

- + Perfect hold and fit in the ear
- Volume or gain deviations are absorbed and acoustic feedback is avoided
- Ultimate hearing result and optimal use of hearing system features thanks to best sealing
- + New colors for hard earmolds

CERTIFIED QUALITY

Our DLO® portfolio offers hearing protection for a wide range of applications, e.g. at work, for music lovers or frequent flyers. The filter systems reliably attenuate disturbing or harmful noise to a non-critical level. The noise protection effect has been proofed in a type examination by an independent testing laboratory and the products are approved as PPE.

- + Customized 3D printed earmolds with 100 % geometric matching for a perfect fit in the ear
- + Pleasant noise attenuation
- + Speech intelligibility is maintained
- + Easy insertion and removal
- + Filters with linear and non-linear attenuation for various customer demands
- + Wide range of colors in three construction designs

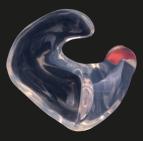

DCO® COMFORTNIGHT

To meet the high demand, we are now offering additional designs for our DCO® ComfortNight earmolds. For a quiet, restful sleep thanks to a perfect fit and maximum wearing comfort.

- + Ideal sealing
- Easy to insert and remove
- + Attenuation of ambient noise
- Perception of e.g. an alarm clock or smoke detector remains
- Great color styles
- Easy to clean with OtoVita®
- ◆ 24/7 online ordering with smartorder.dreve.de

SPECIAL

DCO® SOUNDSTYLE

With DCO® SoundStyle earmolds, you transform your customers' standard earphones into something special: With our customized plugs the earphones suit perfectly and securely in the ear. Sounds great: Thanks to our large database, we can offer SoundStyle earmolds for more than 300 different systems available on the market. You just order online and there is no need to send the earphones together with the impressions by mail.

+ Easy to clean with OtoVita®

+ 24/7 online ordering with smartorder.dreve.de

- Premium 3D print materials FotoTec® and FotoCast®
- + High definition production
- Validated digital workflow
- Perfect surface quality of earmolds and shells
- Great color styles

20 YEARS OF 3D PRINT

Since the early 2000s, 3D printing has developed remarkably. Once, it started as a futuristic technology and now has transformed to a revolutionary force in the manufacturing industry in general, but also particularly in our sector of the hearing aid industry.

Dreve was among the pioneers and established CAD/CAM technologies early in its own manufacturing processes, creating many new products and innovations. Now we can look back on two decades of experience and present latest developments in LCD printing today. With the launch of the red **Phrozen Sonic XL 4K – Qualified by Dreve**, we are offering an easy and affordable access to the 3D printing world. With our great experience and unique understanding of service, we guide you through the entire digital workflow.

WITH NEW FORMULATION

OTOFERM® CREME

Increases wearing comfort and is used for better acceptance and additional sealing of the earmold.

- + New, improved formulation with aloe vera
- + Easy application
- + Very fresh: clear transparent gel
- + Pleasant scent with a touch of chamomile
- + Coming soon: Hygienic dispenser for pumping and convenient dosing

RED LOGO, GREEN IDEAS

It is quite natural that Dreve quality products and services of course take the matter of sustainability into account. It continuously influences the optimization and development of our technologies, processes, packaging and innovations.

We have already made significant progress in implementing green strategies. However, we see sustainability as an ongoing process and remain committed to protecting our environment and shaping a more sustainable future.

Our actions:

- Reducing waste by eliminating unnecessary plastic packaging and replacing it with recyclable paper packaging
- + Photovoltaic system: Efficient use of solar energy and CO₂ reduction
- + Electromobility: Continuous conversion of our company cars and provision of charging stations
- + Regional suppliers: Collaboration with local suppliers for short distances and lower environmental impact
- + Sustainable & organic economic growth: Pursuit of an ecological and social growth model with long-term strategies

SUSTAINABLE WE MAKE THE CHANGE
