SAFETY FIRST

At work we are usually exposed to different noises, which could harm our hearing in the long run. If an average continuous sound level of 80 dB is exceeded, an employer is obliged to provide suitable noise protection for employees. With our professional hearing protection, we offer you the best solution to minimize and avoid possible discomfort such as tinnitus, stress, high blood pressure or headaches.

FOR PROFESSIONALS

Dreve hearing protection earmolds (DLO®) are certified and type approved as Personal Protective Equipment (PPE) according to Regulation (EU) 2016/425 and meet the official requirements at work.

Biopor® AB Xtrack:
Completely detectable
especially for the food
industry

- 3D printed earmold with 100 % customized geometry
