SOUNDS GOOD

Protect your ears with the customized Dreve hearing protection earmolds (DLO®) with integrated and innovative DM filters, especially for music fans.

MINI FILTER FOR MAXIMUM SOUND QUALITY

The DM filters are particularly discreet in the ear and attenuate the volume linearly over the entire frequency range; music, speech or noises are quieter like turning down a radio without changing or distorting the sound.

- 3D printed earmold with 100 % customized geometry
- High wearing comfort and good grip
- Unobtrusive in the ear
- Specially designed for e. g. concerts, festivals or disco
- Certified and professional PPE
- Noise reduction over the entire frequency range
- Ear-friendly volume with natural sound quality
- Good speech intelligibility
- Different filter options
- Available in hard (acrylic) or soft (silicone)
- Great color styles
- Easy to clean (e. g. with OtoVita®)
