FOR A SILENT AND RELAXING SLEEP

For many people a healthy and peaceful sleep is wishful thinking. Distractions from good sleep have various reasons, but very but often these are disturbing noises. Did you know that e.g. loud snoring corresponds to the noise level of a jack-hammer? Furthermore gnashing teeth, airplanes, cars, noisy neighbors, or loud music can disturb your sleep and could cause mental pressure or physical stress. With your customized ComfortNight earmolds you can sleep peacefully again and start the next day perfectly relaxed.

A DREAM

- 3D printed earmold with 100 % customized geometry
- Perfect fit for high wearing comfort during the night
- Ideal sealing
- Easy to insert and remove
- Attenuation of ambient noise, but the perception of e.g. an alarm clock or smoke detector remains
- Great color styles
- Easy to clean (e. g. with OtoVita®)
