

Press release 2023

[67th International EUHA Congress]

Dear Sir or Madam,

We are pleased that the 67th International Congress for Hearing Aid Acousticians, taking place from 18th to 20th October in Nuremberg (GER), meets your interest and you would like to inform your readership about this event around the topic of hearing. In this press kit you will find this year's Dreve updates and further information on our trade show highlights.

A short preview:

Only with silicones

Processing times are changing for our premium silicones in the **Biopor® AB** product family for earmold production enabling more efficient working. In addition, the colors will be more brilliant. From now on, our impression silicone will be even faster: the new **Otoform® A softX boost** takes 90 seconds to cure which is indicated by a color change from green to neon yellow.

20 years of 3D printing at Dreve

In recent years, 3D printing has been evolving a lot. We present latest developments in LCD printing and along the entire digital workflow.

The earmold is key

In the new catalog "Earmold Portfolio No. 24", we present our current range of earmolds, rounding out our online ordering system **SmartOrder**, well-known for its intuitive and easy configuration of earmolds.

Come and visit us at our booth (4A.205) to see our products live. Your personal contact, Ina Seidensticker (Marketing Manager), will be happy to provide you with further information. You will find all necessary product info also online: future.dreve.de

We hope you have an interesting and informative visit.

Kind regards,

Your Dreve Otoplastik GmbH
